Program

<Contents>

- Introduction of our business contents , Company tour , Safety instructions
- Work experience

1 Study and research on image analysis for surveillance

It is likely that a combination of face-to-face and online formats will be used.

During the period, one week will be held online, with a results report meeting planned every evening.

2 On-the-job experience in the construction and upkeep of electrical and communication facilities

- Review and reflection of the on-the-job experience
- Create a summary report of the review and reflections (with MS Power Point)

A Zoom meeting with candidates will be conducted three weeks prior to review and discuss the internship schedule and program details.
