Program

<Contents>

We manufacture “castings,” which are parts used in semiconductor equipment and machine tools.

- 1.Filling sand into molds
- 2.Removing the hardened sand from molds
- 3.Shaping and cleaning from the sand molds by removing unnecessary parts
- 4.Coating sand molds with specialized paint
- 5.Castings are made by combining various shaped molds and pouring molten iron into them
- 6.Finishing the products by grinding off excess material and painting.
